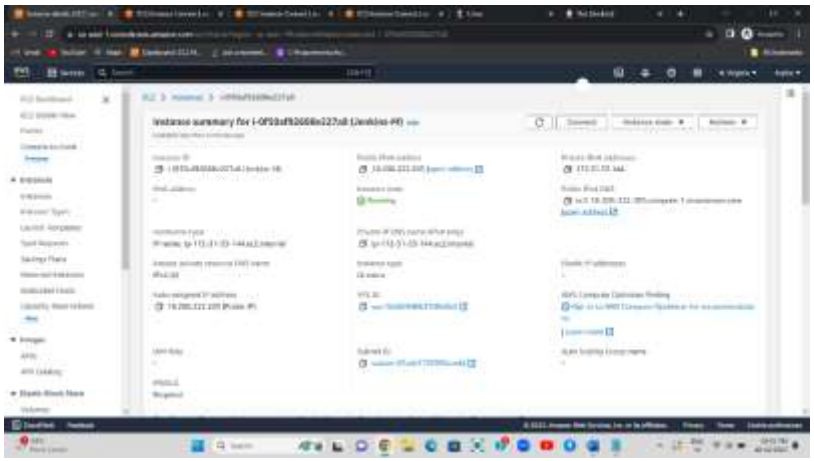
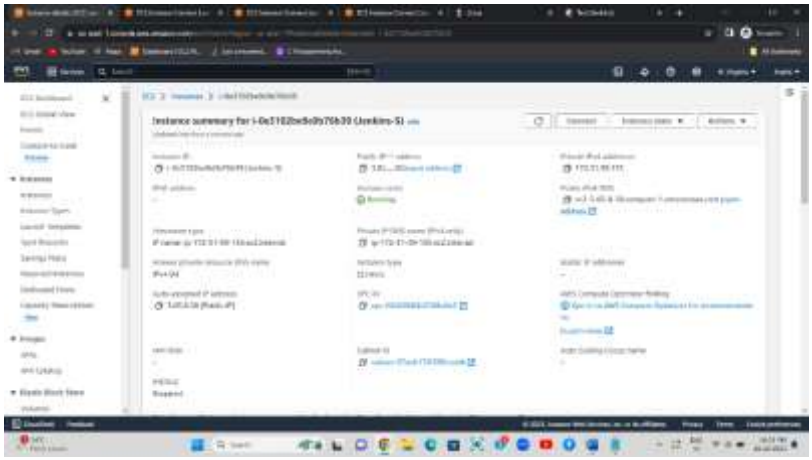
JENKINS ASSIGNMENT 1

1. Trigger a pipeline using Git when push on develop branch

2. Pipeline should pull Git content to a folder





master

sudo apt update

sudo apt install openjdk-11-jdk -y

java --version

sudo su

a.sh

sudo nano a.sh

bash a.sh

service jenkins status

sudo cat /var/lib/jenkins/secrets/initialAdminPassword

mkdir Assignment

cd Assignment

```
ls
git init
git remote add origin https://github.com/Anushasbisnalli/jenkins.git
touch demo.txt
git branch
ls
git add .
git commit -m " demo "
git branch
git checkout -b develop
git branch
 ls
touch develop.c
git add .
git commit -m " develop "
git push origin master
git push --all
history
```

slave

```
sudo apt update
sudo apt install openjdk-11-jdk -y
java --version
ls
ls -R
ls
cd jenkins/
ls
cd workspace/
ls
cd Job1/
ls
cat demo.txt
```

cd

history
