1. Use the saved image in the previous assignment **sudo**

   apt update

2. Upload this image on Docker Hub **sudo apt install**

   docker.io -y docker --version

sudo docker pull anusha2k1/dockerimage08 sudo

docker images

3. On a separate machine pull this Docker Hub image

   and launch it on port 80 **sudo docker run -itd -p**

   80:80 anusha2k1/dockerimage08

sudo docker exec -it
7d7ecde8cb60bab3dbce5af94117e28eb81df41652c824c21b06d10614c276d7 bash

4. Start the Apache2 service **apt update apt install**

   apache2 -y service apache2 status service apache2

   start

5. Verify if you are able to see the Apache2 service
